- \* Resin Doming Machines for you to dome in-house.

If you want to know anything about doming ask the Experts

## Chemical Etching

Registered Office plaques are our speciality, plates can be mounted onto mahogany frames / plinths. Chemically etching is also used for nameplates. For Brass or Stainless Steel nameplates we etch them in multi - image sheets and cut them to size later, this process is very economical for quantities of approx. 50 upwards to over 5000 +. Machine Engraving is available for 1 off's using standard fonts

Our Etching machine is probably the largest in the nameplate industry it can Etch a sheet at 2400 x 1200 mm ( 8ft x 4ft ) Maximum Width is 48 " ( 1220 mm ) but the length is not really restricted.

## Screenprinting

Screenprinted labels can be surface printed or sub-surface printed. Materials used include Polycarbonate, Polyester and PVC in both matt and gloss finishes. Various adhesive can be applied to the rear, any clear windows / buttons can have adhesive free areas.

Embossed buttons are also available.
